

24th World Congress of Dermatology
Milan, Italy, June 10-15, 2019
International League of Dermatologic Societies (ILDS)
Sister Society Meeting, Monday June 10, 2019; 1:30-5:30 pm

Dermatopathology Worldwide – ISDP, ASDP, ESDP, SILADEPA, EADV Joint meeting
PROGRAM

Keynote Lectures (1:30-3:30 pm)

- 1:30 – 1:40 pm Dieter Metze - Multi-dimensional analysis of pathological changes in inflammatory and genetic dermatoses
- 1:41 – 1:50 pm Franco Rongioletti - Pigmentary deposition skin disorders in white patients
- 1:51 – 2:00 pm María-Teresa Fernández Figueras - Lessons learned from pseudolymphomas
- 2:01 – 2:10 pm Gürkan Kaya - What's new in dermatological research: Implications for dermatopathology
- 2:11 – 2:20 pm Victor Prieto - Description on cutaneous side effects of targeted agents and immunotherapy
- 2:21 – 2:30 pm Lorenzo Cerroni - European examination in dermatopathology: standards and goals
- 2:31 – 2:40 pm Omar Sanguenza - The importance of clinical correlation in Dermatopatology
- 2:41 – 2:50 pm Rossitza Lazova - An unexpected encounter in the 21st century
- 3:01 – 3:10 pm Camilla Reggiani and Giovanni Pellacani - New digital Dermatopathology with ex vivo confocal Microscopy
- 3:11 – 3:20 pm Martin Sanguenza - Primitive myxoid mesenchymal tumor of infancy
- 3:21 – 3:30 pm Adam Rubin - The critical interaction of nail disease, nail surgery, and onychopathology

Break (3:30-3:45 pm)

Oral abstract presentations (3:45-5:30 pm) “Dermatopathology makes a difference”

- 3:45 Rossitza Lazova - Introduction
- 3:50 Joyce Lee - Pityriasis Rubra Pilaris-like Recalcitrant Psoriasiform Dermatitis of the Face. A new variant of PRP?
- 3:55 Ben Tallon - Did you say radish?
- 4:00 Gerardo Ferrara - Clinicopathological correlations in melanocytic skin tumors: the clinical picture can make a difference
- 4:05 Raffaele Gianotti - Pediatric dermatopathology, state of the art.
- 4:10 Carlo Francesco Tomasini - Erosive pustular dermatosis of the scalp: original observations and novel concepts
- 4:15 Phyu P Aung - Melanoma Coexisting with Solar Elastosis: A Potential Pitfall in the Differential Diagnosis between Nevus and Melanoma
- 4:20 Helmut Beltraminelli - Development of Dermatopathological Expertise in Africa
- 4:25 Ata Moshiri - Nail Unit Acantholytic Dyskeratotic Acanthoma: A Rare Cause Of Monodactylous Longitudinal Erythronychia
- 4:30 Anna Maria Cesinaro - Cutaneous Leishmaniosis in a Formerly non-endemic Geographic area" An Emergent Disease Uncovered by Dermatopathology
- 4:35 Adrian Ormsby - Metastatic Large Cell Neuroendocrine Carcinoma of the Lung Presenting as Metastases to the Skin
- 4:40 Andrea Saggini - Papular mycosis fungoides is a distinctive variant of early stage mycosis fungoides: extended retrospective study with long-term follow-up

4:45 Carlos Antonio Torres Cabala - A Young Patient Presenting With Bilateral Caruncle Masses

4:50 Carlotta Baraldi - Nail unit melanocytic activation/hyperplasia may be considered a precursor on nail matrix melanoma rather than nail matrix nevi

4:55 Kevin White - Immunodeficiency and granulomas: the spectrum of sarcoidal, perifollicular, and tuberculoid patterns

5:00 Hannah Hill - Keloidal variant of atypical fibroxanthoma

5:05 Maria Mazzei - Criptococcoid Sweet's Syndrome: May simulate Criptococcosis not only histologically but also clinically

5:10 Cesare Massone – Atypical clinical presentation of primary cutaneous B-cell lymphoma

5:15 Tammie Ferringer – Clues to calciphylaxis

5:20 Anjela Galan - Sclerosing plaque on the face

Goals & Objectives

1. To demonstrate the crucial role of dermatopathology in the diagnosis of dermatologic disorders
2. To highlight the cost effectiveness of dermatopathology
3. To show the range of tests that can be performed on skin biopsies
4. To introduce the International Committee of Dermatopathology and its efforts to increase the standards of dermatopathology knowledge worldwide
5. To bring to light the expertise of dermatopathologists from around the world
6. To introduce new emerging roles of dermatopathology in the diagnostic process
