

Wednesday, February 27, 2019

ALL DAY

8:00am-5:00pm Posters on Display Washington

MORNING:

7:00am-12:30pm Registration/Information..... Virginia Foyer
 8:00am-10:00am Morning Sessions (see details below)..... Locations listed below
 10:00am-10:30am Break/Poster Defense with Q/A..... Washington
 10:30am-12:36am Morning Sessions (see details below)..... Locations listed below

LUNCH:

12:30pm-2:00pm Lunch Break (on your own)
 12:30pm-2:00pm *Executive Committee Meeting*..... Monroe Room

AFTERNOON:

2:00pm-5:00pm Registration/Information..... Virginia Foyer
 2:00pm-4:00pm Afternoon Sessions (see details below)..... Locations listed below
 4:00pm-4:30pm Break..... Virginia Foyer
 4:30pm-6:30pm Afternoon Sessions (see details below)..... Locations listed below
 6:30pm-8:15pm Welcome Reception!..... Virginia Foyer/Relish

8:00am-5:00pm	POSTERS ON DISPLAY	Washington
----------------------	---------------------------	-------------------

8:00am-10:00am	Self Assessment Session A	Crystal Ballroom
-----------------------	----------------------------------	-------------------------

(Separate registration required.)

Course Directors: **Carlos A. Torres-Cabala, Aleodor Andea, M. Angelica Selim**

8:00am-10:00am	Oral Abstract Presentations	Adams/Madison
-----------------------	------------------------------------	----------------------

** Abstracts presented in Free Communications will be published online in The American Journal of Dermatopathology*

Course Directors: **Doina Ivan, Rossitza Lazova, Renata A. Joffe**

Moderators/Judges: **Doina Ivan, Rossitza Lazova, Renata A. Joffe, Ángel Fernández-Flores**

Objectives: Gain exposure to and improve understanding of newly described and/or rare conditions affecting the skin and mucosa through presentation and discussion of original work and interesting and/or extraordinary case reports.

- 8:00am-8:06am GRANULOMATOUS SKIN ERUPTION IN COMMON VARIABLE IMMUNODEFICIENCY
Crum, Olivia M.
- 8:06am-8:12am THE HISTOPATHOLOGY OF URTICARIA REVISITED – CLINICAL PATHOLOGICAL STUDY
Barzilai, Aviv
- 8:12am-8:18am PUSHING AND LOSS OF ELASTIC FIBERS IN MELANOCYTIC LESIONS IS HIGHLY SPECIFIC FOR MELANOMA AND IS RARE IN MELANOCYTIC NEVI
Beltraminelli, Helmut
- 8:18am-8:24am TWO CASES OF SUBCUTANEOUS SWEET SYNDROME WITH HISTIOCYTOID FEATURES
Brady, Mary
- 8:24am-8:30am PROMINENT TRANSEPIDERMAL MELANIN DEPOSITION IS A DISTINGUISHING HISTOPATHOLOGIC FEATURE OF MELASMA
Hafeez, Farhaan

Wednesday, February 27, 2019

8:00am-10:00am

Oral Abstract Presentations (cont'd)

Adams/Madison

** Abstracts presented in Free Communications will be published online in The American Journal of Dermatopathology*

- 8:30am-8:36am LATE ONSET ECCRINE ANGIOMATOUS HAMARTOMA WITH MYXOID FEATURES: A REPORT OF TWO CASES
Haghayeghi, Koorosh
- 8:36am-8:42am PERPLEXING CASES OF PANNICULITIS: EXPANDING THE DIFFERENTIAL DIAGNOSIS OF PANNICULITIS
Hanson, Jennifer L.
- 8:42am-8:48am INTEROBSERVER RELIABILITY IN DISTINGUISHING XANTHOGRANULOMA FROM RETICULOHISTIOCYTOMA
Hoyt, Brian S.
- 8:48am-8:54am SIGNET-RING SQUAMOUS CELL CARCINOMA IN SITU: REPORT OF A RARE ENTITY AND A REVIEW OF THE LITERATURE
Huang, Yuan Yu Michael
- 8:54am-9:00am COMBINED PROGNOSTIC SIGNIFICANCE OF DEFECTIVE MISMATCH REPAIR AND BRAFV600E MUTATION IN MELANOMA
Kasago, Israel
- 9:00am-9:06am ATYPICAL GENERALIZED ENTEROVIRAL ERUPTION IN AN ADULT: NOT LIMITED TO "HAND, FOOT AND MOUTH" DISEASE
Krbanjevic, Aleksandar
- 9:06am-9:12am HAEMATOXYLIN-EOSIN STAINING PATTERN OF ACRALI STRATUM CORNEUM CORRESPONDS TO CRISTAI PROFUNDAI IN ACRAL MELANOCYTIC LESIONS
Liu, Yi
- 9:12am-9:18am MALIGNANT GRANULAR CELL TUMOR PRESENTING WITH DISTINCT BENIGN AND SARCOMATOUS CELL POPULATIONS
Marinelli, Lisa M.
- 9:18am-9:24am HISTOPATHOLOGIC COMPARISON OF CUTANEOUS ADVERSE EVENTS IN IMMUNE CHECKPOINT BLOCKADE THERAPY
Narala, Saisindhu
- 9:24am-9:30am HYALINE CELL-RICH APOCRINE MIXED TUMOR WITH CYTOLOGIC ATYPIA
Ohata, Chika
- 9:30am-9:36am CUTANEOUS INVOLVEMENT IN MULTIPLE MYELOMA: A SERIES OF TEN CASES
Panse, Gauri
- 9:36am-9:42am LEF-1 AND β -CATENIN EXPRESSION IN ACRAL LENTIGINOUS MELANOMA
Ramani, Nisha
- 9:42am-9:48am ACNEIFORM-LIKE PRESENTATIONS OF FOLLICULOTROPIC MYCOSIS FUNGOIDES
Riemer, Christie
- 9:48am-9:54am CUTANEOUS XANTHOGRANULOMA IN CHILDREN AND ADULTS: A 29-YEAR EXPERIENCE
Salari, Behzad

Wednesday, February 27, 2019

10:00am-10:30am - DEFENSE OF POSTERS - Washington
SEE PRESENTERS AND POSTER TITLES LISTED AT END OF THURSDAY'S PROGRAM

10:30am-12:30pm Self-Assessment Session B Crystal Ballroom
(Separate registration required.)

Course Directors: **Carlos A. Torres-Cabala, Aleodor Andea, M. Angelica Selim**

10:30am-12:36pm "Dermatopathology Trainee World Cup" Adams/Madison

** Abstracts presented in Free Communications will be published online in The American Journal of Dermatopathology*

Course Directors: **Doina Ivan, Rossitza Lazova, Renata A. Joffe**

Moderators/Judges: **Doina Ivan, Rossitza Lazova, Renata A. Joffe, María Teresa Fernández-Figueras, M. Angelica Selim**

Objectives: Gain exposure to and improve understanding of newly described and/or rare conditions affecting the skin and mucosa through presentation and discussion of original work and interesting and/or extraordinary case reports presented by physicians in training.

10:30am-10:36am

INTRODUCTION BY COURSE DIRECTOR

10:36am-10:42am

A GEOGRAPHIC INFLAMMATORY DERMATITIS IN A PATIENT WITH ANTI-FIBROBLAST GROWTH FACTOR 3 ANTIBODY SMALL FIBER NEUROPATHY
Bell, Ann T.

10:42am-10:48am

DIFFUSE DERMAL ANGIOMATOSIS WITH CLINICAL FEATURES SIMULATING CALCIPHYLAXIS IN THE SETTING OF END-STAGE RENAL DISEASE
Braswell, Diana S.

10:48am-10:54am

MOLLUSCOID SWEET SYNDROME: A RARE CLINICAL VARIANT
Ahn, Christine S.

10:54am-11:00am

METASTATIC MALIGNANT MELANOMA OF UNKNOWN PRIMARY MIMICKING AN EPITHELIOID MALIGNANT PERIPHERAL NERVE SHEATH TUMOR: UTILITY OF NEXT GENERATION SEQUENCING
Elkeeb, Dena

11:00am-11:06am

A CASE OF CUTANEOUS SPINDLE CELL ADENOLIPOMA WITH ECCRINE AND APOCRINE DIFFERENTIATION
Farah, Maya

11:06am-11:12am

LEPROMATOUS LEPROSY- AN ELUSIVE MIMICKER MISTAKEN FOR POLYARTERITIS NODOSA & DISSEMINATED TUBERCULOSIS
Fasciano, Danielle

11:12am-11:18am

SMALL VESSEL VASCULITIS- A RARE SIDE EFFECT OF TNF-ALPHA INHIBITORS
Heaton, Sarah

11:18am-11:24am

AN UNUSUAL PRESENTATION OF PYEMOTES VENTRICOSUS DERMATITIS PRESENTING WITH UMBILICATED PAPULES MIMICKING POX VIRUS INFECTION
Henning, Ania

11:24am-11:30am

PSEUDOEPITHELIOMATOUS HYPERPLASIA ASSOCIATED WITH BASAL CELL CARCINOMAS: A HISTOPATHOLOGIC CASE SERIES
Holte, Kristofer

Wednesday, February 27, 2019

10:30am-12:36pm **"Dermatopathology Trainee World Cup" (cont'd)** **Adams/Madison**

** Abstracts presented in Free Communications will be published online in The American Journal of Dermatopathology*

- 11:30am-11:36am PRIMARY CUTANEOUS EWING SARCOMA
Jurgens, Andrea
- 11:36am-11:42am PLEOMORPHIC FIBROMA IN ASSOCIATION WITH MUTATION IN RB1 GENE
Kaur, Amandeep
- 11:42am -11:48am TRICHOBLASTIC CARCINOSARCOMA
Mansoori, Parisa
- 11:48am-11:54am ISOLATED PRIMARY VAGINAL CHLOROMA WITHOUT ANY
HEMATOLOGICAL MALIGNANCY- A RARE ENTITY WITH UNIQUE
PRESENTATION
Modi, Mitul B.
- 11:54am-12:00pm MUCINOUS ECCRINE NEVUS
Moradi, Sara
- 12:00pm-12:06pm A CASE OF SYSTEMIC LUPUS ERYTHEMATOSUS WITH LUPUS PROFUNDUS
IN A PATIENT PREVIOUSLY DIAGNOSED WITH KIKUCHI-FUJIMOTO
DISEASE: A CAUTIONARY TALE
Pham, Anh K.
- 12:06pm-12:12pm CLEAR CELL CUTANEOUS ANAPLASTIC LARGE CELL LYMPHOMA
Ronen, Shira
- 12:12pm-12:18pm HYPERGRANULOTIC DYSORNIFICATION: A MYSTERIOUS EPITHELIAL
REACTION PATTERN
Roy, Simon F.
- 12:18pm-12:24pm BASAL CELL CARCINOMA WITH MATRICAL DIFFERENTIATION – A RARE
HISTOLOGIC VARIANT
Saenz-Ibarra, Barbara
- 12:24pm-12:30pm ERYTHEMA MIGRANS AND INTERFACE CHANGES: MORE THAN A
FORTUITOUS ASSOCIATION
Tekin, Burak
- 12:30pm-12:36pm ATYPICAL ADULT ONSET STILL'S DISEASE: ATYPICAL PERSISTENT
PATCHES AND PLAQUES AS PRESENTING SYMPTOMS OF A
PARANEOPLASTIC SYNDROME?
Tjarks, B. Joel

12:30pm-2:00pm **Executive Committee Meeting (EC Members Only)** **Monroe**

2:00pm-6:30pm **Self-Assessment Discussion** **Crystal Ballroom**

(Separate registration required.)

Course Directors: **Carlos A. Torres-Cabala, Aleodor Andea, M. Angelica Selim**

Objectives: Recognize key light microscopic features of common, rare, and unusual entities without benefit of immunohistochemistry or histochemistry (special stain); expand diagnostic skills by increasing familiarity with a variety of skin conditions; differentiate between diseases with similar or overlapping histologic features.

Wednesday, February 27, 2019

Melanocytic Tumors

Adams/Madison

Course Directors: **Philip E. LeBoit and Arnaud de la Fouchardiere**

Objectives: 1. Integrate advances in molecular biology of melanocytic tumors into clinical practice. 2. Appraise the usefulness and limitations of immunostaining in the diagnosis of melanocytic tumors. 3. Apply the revised WHO guidelines for classification of melanocytic neoplasms

Faculty:

Arnaud de la Fouchardiere: "Morpho-genetic correlations in melanocytic tumors: Dream or reality?"
Klaus J. Busam: "Immunohistochemistry for the assessment of melanocytic proliferations: What's new?"
Iwei Yeh: "Spitz and spitzoid - what's the difference?"
Boris Bastian: "Paradigms for tumor classification: The updated WHO classification of melanomas"
Philip E. LeBoit: "Decisions in melanocytic dermatopathology: What's the evidence?"

4:30-5:30pm

Best in *The American Journal of Dermatopathology*

Adams/Madison

Moderator: **Omar Sangüeza**

Objectives: Authors of articles with high citation rates in *The American Journal of Dermatopathology* (AJDP) will present overviews of their papers. Emphasis will be placed on how their goals and data affected the practice of dermatopathology and dermatology. Effectively, this session will provide a broad update in the field of dermatopathology by covering a range of disorders. Following this session, the attendee should be able to: 1. Critically examine key articles, highly cited in the AJDP, which describe advances in dermatopathology. 2. Recognize and apply new dermatopathologic approaches to the diagnosis of skin disease. 3. Appreciate the importance of clinical-pathologic correlation for the diagnosis of skin disease.

Faculty:

Silvia V. Lourenço: Hsieh R, Nico MM, Camillo CM, Oliveira KK, Sanguenza M, **Lourenço SV.** Mutational Status of NRAS and BRAF Genes and Protein Expression Analysis in a Series of Primary Oral Mucosal Melanoma. *Am J Dermatopathol.* 2017 Feb;39(2):104-110.

Jose A. Plaza: Buonaccorsi JN, Prieto VG, Torres-Cabala C, Suster S, **Plaza JA.** Diagnostic utility and comparative immunohistochemical analysis of MITF-1 and SOX10 to distinguish melanoma in situ and actinic keratosis: a clinicopathological and immunohistochemical study of 70 cases. *Am J Dermatopathol.* 2014 Feb;36(2):124-30.

Wednesday, February 27, 2019

4:30-5:30pm Best in *The American Journal of Dermatopathology* (cont'd) Adams/Madison

Faculty, Cont'd:

Christine S. Ahn: Ahn CS, ALSayyah A, Sangüeza OP. Mycosis fungoides: an updated review of clinicopathologic variants. *Am J Dermatopathol.* 2014 Dec;36(12):933-48; quiz 949-51.

Victor G. Prieto: Zhou JH, Kim KB, Myers JN, Fox PS, Ning J, Bassett RL, Hasanein H, Prieto VG. Immunohistochemical expression of hormone receptors in melanoma of pregnant women, nonpregnant women, and men. *Am J Dermatopathol.* 2014 Jan;36(1):74-9.

Shaun Chou: Choy B, Chou S, Anforth R, Fernández-Peñas P. Panniculitis in patients treated with BRAF inhibitors: a case series. *Am J Dermatopathol.* 2014 Jun;36(6):493-7

5:30-6:30pm

"Stump the Chumps/Champs"

Adams/Madison

Moderators: **Victor G. Prieto and María Teresa Fernández-Figueras**

Four experienced dermatopathologists will face a series of unknown cases. In several rounds, each speaker will have to analyze a case thinking out loud, considering the differential diagnosis and concerns on possible caveats. Clinical information and additional studies will be offered on demand. The discussion will be open to the other experts and the audience before providing final diagnosis and follow-up.

Objectives: At the conclusion of the session the participants will: 1) Understand the mental mechanisms used by experts to make a diagnosis. 2) Comprehend the importance and necessity of clinical correlation in relation to microscopic findings to provide a correct diagnosis. 3) Learn about the need of navigate cases, considering the different diagnostic options, before deciding which additional techniques are required. 4) Know which are the most important caveats to consider in front of different situations. 5) Expand knowledge of a wide variety of cutaneous disease processes, including neoplasms, inflammatory, infectious, and autoimmune diseases.

8:00am-10:00am	Soft Tissue Tumors	Adams/Madison
-----------------------	---------------------------	----------------------

Course Directors: **Omar P. Sangüeza and Steven D. Billings**

Objectives: At the conclusion of the session on “Soft Tissue Tumors” the participants should be able to:
 a) Develop a differential diagnosis for **soft tissue tumors** based on anatomic site; depth and histopathological patterns. b) Understand the basic concepts, including: background, clinical, histological and immunohistochemical features pertaining to entity. c) Comprehend the importance and necessity of clinical correlation in relation to microscopic findings to provide a correct diagnosis. d) Expand knowledge of a wide variety of molecular tests available for the diagnosis of soft tissue tumors.

Faculty:

Steven Billings: Adipocytic tumors
 Rajiv Patel: Fibroblastic/fibrohistiocytic tumors
 Darya Buehler: Tumors of uncertain histogenesis
 Karen Fritchie: Genital stromal tumors
 Omar P. Sangüeza: Vascular lesions

2:15pm-3:00pm "2019 SABINE KOHLER LECTURE AND AWARD" Adams/Madison

The 2019 Sabine Kohler Lecturer: Miguel Reyes-Múgica, M.D.

"A Life Studying Congenital Melanocytic Proliferations. *Development* is the Key"

3:00pm-5:00pm Advanced Algorithms of Inflammatory Diseases Adams/Madison

Course Directors: **Dieter Metze and Jacqueline Junkins-Hopkins**

Objectives: See below:

Faculty:

Dieter Metze:

"Neutrophils meet epithelia: New clues and diagnoses"

Neutrophilic granulocytes have important functions in infectious and non-infectious diseases. Presence of neutrophils along the dermal-epidermal junction, within the epidermis and adnexal epithelia can be seen in drug reactions, autoimmune and hereditary diseases. The presentation discusses diagnostic clues and differential diagnostic problems when neutrophils meet epithelia.

3:00pm-5:00pm Advanced Algorithms of Inflammatory Diseases (cont'd) Adams/Madison

Faculty Cont'd:

Jacqueline Junkins-Hopkins: "Lichenoid infiltrates: It's all about where you hang out and the company you keep"

1. Identify some histopathologic features that are seen in a vacuolar interface reaction. 2. Identify some disorders that show lichenoid tissue reaction on biopsy. 3. Identify histopathologic features that might help differentiate some of the lichenoid dermatoses.

Almut Böer-Auer: "When the clue is in between: Interstitial Patterns revisited"

Interstitial infiltrates are often subtle and can easily be overlooked. This presentation summarizes interstitial patterns in a systematic approach highlighting important differential diagnoses and alerting to relevant new observations.

Mar Llamas-Velasco: "Neutrophilic infiltrates in panniculitis"

Neutrophilic infiltrates in panniculitis can be seen in different clinico-pathological entities. There is a "mostly neutrophilic inflammatory infiltrate", in some entities defined as neutrophilic panniculitis, that includes infection-induced panniculitis, subcutaneous Sweet syndrome, pancreatic panniculitis and α -1 antitrypsin deficiency panniculitis. However, there are also other panniculitis where neutrophils are frequently observed such as panniculitis associated with inflammatory bowel disease, rheumatoid arthritis, or drug-induced panniculitis associated with BRAF-inhibitors. Finally, some panniculitis that are better classified in other panniculitides groups, but may present with neutrophil-rich variants.

We will briefly discuss the main clinical and histopathological features of most of these panniculitides.

5:30-6:30pm

" Challenge to the Experts"

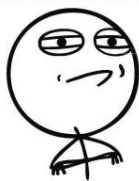

Adams/Madison

Moderator: **Omar P. Sangüeza**

Objectives: At the conclusion of the "Challenge", the participants should be able to:

1) Envision the clinical appearance of lesions based on the history and descriptive narratives provided with each specimen. 2) Formulate a differential diagnosis, using the history and clinical description prior to reviewing the histology. 3) Understand the basic concepts, including background, clinical and histological features and treatment, pertaining to each case. 4) Comprehend the importance and necessity of clinical correlation in relation to microscopic findings to provide a correct diagnosis. 5) Expand knowledge of a wide variety of cutaneous disease processes, including neoplasms, inflammatory, infectious, and autoimmune diseases.

EXTREMITY LESIONS

Marinelli, Lisa M.

WELLS SYNDROME ASSOCIATED WITH LYMPHANGITIS

Mejbel, Haider A.

ALK EXPRESSION IN MERKEL CELL CARCINOMA. AN IMMUNOHISTOCHEMISTRY STUDY
IN 210 CASES

Mendoza-Cembranos, María Dolores

LANGERHANS CELL HISTIOCYTOSIS AND MULTIPLE RETICULOHISTIOCYTOMAS IN A
PATIENT WITH TAR SYNDROME A NON-PREVIOUSLY DESCRIBED ASSOCIATION

Menicanti, Claudia

COMPREHENSIVE HISTOPATHOLOGICAL STUDY OF MALIGNANT MELANOMA WITH IMMUNOHISTOCHEMICAL ANALYSIS- STUDY FROM TERTIARY CARE CANCER CENTER

Modi, Mitul

ONYCHOLEMMAL CARCINOMA; TWO CASES WITH LITERATURE REVIEW

Mubasher, Adnan

NEUROTHEKEOMA MULTIPLICITY - A MULTIPLY OCCURRING AND RECURRENT CASE OF A RARE ENTITY

Myers, David J.

PRIMARY SYSTEMIC AMYLOIDOSIS- A SUBTLE DEPOSITION PATTERN

O'Connor, Heather

A HISTOLOGIC ANALYSIS OF NINETY MERKEL CELL CARCINOMAS

Ogawa, Toru

FOREIGN BODY GRANULOMATOUS REACTION BY PERMANENT FILLING MATERIAL

Quezada Almonte, Jana

A CHALLENGING CASE OF RETICULATE HYPERPIGMENTATION ASSOCIATED WITH R-CHOP

Rigi, Mohammed

ANGIOCENTRIC DIFFUSE LARGE B CELL LYMPHOMA AN UNUSUAL PRESENTATION OF LYMPHOMA INVOLVING THE BREAST

Rohr, Bethany

SOLITARY AND MULTIPLE EPIDERMOLYTIC ACANTHOMA : A STUDY OF 131 CASES

Roy, Simon

"A RARE CASE OF LICHEN PLANUS-LIKE ATOPIC DERMATITIS INVOLVING THE HANDS"

Saleh, Jasmine

A "CYST" EXCISION WITH UNEXPECTED DERMAL MYELOID SARCOMA

Sayah, Maryam

ENCAPSULATED NEUROFIBROMA IN AN OTHERWISE HEALTHY PATIENT-REACTIVE PROCESS OR RARE ENTITY

Schaffenburg, William

PALMOPLANTAR LICHENOID DRUG ERUPTION SECONDARY TO DARBEPOETIN

Simpson, Meagan

FACTITIOUS DISORDER MASQUERADING AS VASCULOPATHY

Slaught, Christa

STRONGYLOIDES HYPERINFECTION SYNDROME AND CUTANEOUS DISSEMINATION IN A PATIENT WITH SPHENOID WING MENINGIOMA

Suthiwartnarueput, Worapop

ISCHEMIC FASCIITIS IN A YOUNG, PHYSICALLY ACTIVE MAN

Swanson, Leah

GRANULOMATOUS SUTURE REACTION TO MONOCRYL

Szabo, Sabrina

URTICARIA MULTIFORME – A CLINICOMORPHOLOGIC VARIANT OF URTICARIA COMMON IN CHILDREN

Tekin, Burak

EARLY DISSEMINATED LYME BORRELIOSIS (ERYTHEMATA MIGRANTIA): A DIAGNOSTIC CHALLENGE

Tirado, Mariantonieta

A CASE OF ACCESSORY SCROTUM

Tirado, Mariantonieta

FOLLICULOTROPIC MYCOSIS FUNGOIDES WITH KERATOSIS PILARIS-LIKE HISTOPATHOLOGIC FEATURES: A CHALLENGING DIAGNOSIS

Tjarks, B. Joel

CUTANEOUS ANGIOSARCOMA: A CASE DEMONSTRATING THE UTILITY OF MAPPING BIOPSIES

Ullman, David

PROLIFERATING PILAR TUMOR IMITATING CARCINOMA

Ullman, David

IMPROVED TURNAROUND TIMES FOR EXTERNAL DERMATOPATHOLOGY CONSULTATIONS WITH UP-FRONT ANCILLARY TESTING BY THE CONSULTING PATHOLOGIST

Vuong, Jennifer

AN UNUSUAL CASE OF MERKEL CELL CARCINOMA WITH LOW TUMOR MUTATIONAL BURDEN ON NON-SUN-EXPOSED SKIN OF AN AFRICAN AMERICAN FEMALE

Wysozan, Timothy
